		Intranet	Design and programming of the intranet (clients, commercial agents)	Server HTTP Apache, PHP, MySQL, jQuery, ShellScript, Red Hat

No dates have been specified, in the project pages below the CV, but if it is necessary to expand with more information, let me know. 

Intermittently I have done freelance work in the field of web and mobile programming (more than 15 projects: among them a wine store using PrestaShop, two real-state agencies, several self-administered blogs, professional and corporate webpages), using following technologies: *Server HTTP Apache, Actionscript, PHP, MySQL, WS, HTML, jQuery, Bootstrap...*

Nor has my teaching stage of IT, Office automation, AUTOCAD, etc. been specified, because it was more than 10 years ago. But nowadays I'm completing an professional certificate teacher for the professional education for employment.

Also comment that from June 2019 until now, I have been carrying out, with this last one that I am currently developing, 4 labor certifications:

- Computer Safety.
- Assembly, Installation and Rethinking of Solar Photovoltaic Installations.
- Direction and Coordination of Activities in Children's and Youth Educational Free Time.
- (nowadays) Teaching for Professional Education for Employment.

Additionally, in the same period since June 2019, I have acquired updated training and I have practice with the following technologies, through these courses:

- Master in Full Stack Web Development: APIs REST with Node.js, Symfony 5, Laravel 8 & webapps with Angular 12 Advanced.
- Spring Cloud Microservices & Angular Full Stack.
- Master in Python 3.0
- Avdanced Laravel & Vue Js
- HP QTP/UFT with VBscript
- Test Driven Development with Java y JUnit5

I hope that my profile fits into any of the selection processes that your company have in progress now or near near future.

Thanks for your attention.

Ramón Ramírez de Verger Rodríguez.
